GO Biological Process

-log10(Binomial p value)

Term	-log10(Binomial p value)
regulation of hemopoiesis	129.18
regulation of angiogenesis	102.34
regulation of vasculature development	101.97
regulation of leukocyte differentiation	96.91
positive regulation of vasculature development	79.94
positive regulation of angiogenesis	70.59
positive regulation of hemopoiesis	62.97
regulation of lymphocyte differentiation	61.79
regulation of myeloid cell differentiation	60.83
negative regulation of hemopoiesis	54.29
cellular response to peptide hormone stimulus	51.61
regulation of endothelial cell migration	51.58
vasculogenesis	51.36
cell-substrate adhesion	49.87
endothelium development	48.89
regulation of myeloid leukocyte differentiation	46.92
leukocyte migration	46.71
negative regulation of cell activation	46.05
endothelial cell differentiation	45.61
positive regulation of leukocyte differentiation	45.22
